

## Advantages for Horse Breeders at SBS-Veterinary Services

SBS-Maryland offers distinct advantages for both mare and stallion owners who breed their mares in Chesapeake City at our dedicated Veterinary Services (VS) facility.

### Safe.

- Your frozen semen inventory is managed by SBS MD. SBS technicians and our advanced inventory management software ensure the safety of your frozen semen doses.
- Stallions frozen in the SBS network undergo health testing and bacterial culture on every ejaculate to avoid the introduction of potential mare pathogens at breeding.

### Simple.

- You can avoid FedEx shipping and handling fees for frozen semen in storage at SBS-MD. Money saved can be utilized for mare management services.
- Unused frozen semen doses can be returned to the commercial inventory without additional quality control testing and later distributed to other mare clients.
- Services are provided by the industry leaders in the logistics of frozen semen to help manage frozen semen inventories, frozen semen allocation and breeding.

### Sure.

- A veterinarian, board certified in equine reproduction, will oversee difficult breeding mares, diagnosis and treatment of infertility, and the management of low-supply frozen semen.
- You will benefit from the reproductive knowledge and client services of SBS to obtain optimal pregnancy rates using fresh, cooled-shipped, or frozen semen doses.

Call our offices at 410.885.3202 or email us at [info@selectbreeders.com](mailto:info@selectbreeders.com) for more information on any of our stallion or mare services available in Chesapeake City, Maryland.
